Dear friends and colleagues,

It is a great pleasure and honor for me to invite you for the twelfth anniversary of our Italian-French Symposium, which will take place in September 2026.

Since the first edition, there has been many changes and evolution in our field both from the surgical and oncological perspectives. Alongside the ongoing international transformations, our surgical community has continued a flourishing activity, with cutting edge technology, artificial intelligence, and advancements in molecular oncological therapies.

It is time to sit down and discuss these achievements between experts, colleagues, and friends. I am thereby inviting you to actively participate and discuss different issues on digestive oncologic surgery.

Also, I hope you could have a great time in our magnificent and ancient city.

Looking forward to meeting you all,

Giuseppe Maria Ettorre
